UNIFORM CRIME REPORTS

J. Edgar Hoover, Director, Bureau of Investigation

United States Department of Justice

Washington, D. C.

Volume 2 June, 1931 Number 6

Contents of the June Bulletin.

The June bulletin contains the usual tabulation of offenses known to the police in urban communities, based on the returns submitted to the Bureau of Investigation for that month. These figures will be found in Table I and do not include the offenses reported by county sheriffs, State police, and officers in the possessions, which are included in a separate table designated Table II. Corrections and adjustments in previously published returns, and supplementary returns are likewise published in separate tables.

The term "Offenses known to the police" is designed to include those crimes designated as Part I classes of the Uniform Classification occurring within the police jurisdiction, whether they become known to the police through reports of police officers, of citizens, of prosecuting or court officials, or otherwise. They are confined to the following group of seven classes of grave offenses, shown by experience to be those most generally and completely reported to the police: Felonious homicide, including (a) murder, nonnegligent manslaughter, and (b) manslaughter by negligence; rape; robbery; aggravated assault; burglary—breaking or entering; larceny— theft, including (a) thefts of \$50 and over and (b) thefts of under \$50; and auto theft. The figures contained herein include also the number of attempted crimes of the designated classes. Attempted murders, however, are reported as aggravated assaults. In other words, an attempted burglary or robbery, for example, is reported in the monthly bulletin in the same manner as if the crime had been completed.

"Offenses known to the police" include, therefore, all of the above offenses, including attempts, which are reported by the police departments of contributing cities and not merely arrests or cleared cases.

The bulletin also contains tables showing the extent of the population area represented by contributing cities, exclusive of county and other returns. The number of current and supplementary returns received, by States, for 1931, are also shown, and tables indicating the average daily number of offenses and the per cent of each offense class to the whole number reported are included.

In publishing the reports sent in by chiefs of police in different cities, the Department of Justice does not vouch for their accuracy. They are given out as current information which possibly may throw some light on problems of crime and criminal law enforcement.

Population Table.

The number of cities which at any time during the year of 1931 have contributed returns of offenses known to the police to the Bureau of Investigation reached 1,315 in June. The population represented by those cities is 48,953,414. This, of course, is exclusive of returns received from county and other jurisdictions. Police departments in 1,180 cities contributed returns of offenses known to the police for the month of June. Returns were also received from a number of counties in the various States, State police in several jurisdictions, the first and third divisions of Alaska, Canal Zone, Hawaii, and Porto Rico. Supplementary returns were forwarded from various other possessions. In the following table are shown the number and per cent of the cities and the number and per cent of the population of those cities of more than 10,000 inhabitants from which returns have been received for any one month of 1931. The figures are based on the 1930 census. In addition to those listed in the table there are 596 cities of an aggregate population of 3,317,137 which also contributed returns at some time during the current year. The population represented by the returns from counties and others is not included in this table.

Population groups	Total number of cities or towns		Cities filing returns		Total population		Population represented in returns	
	Number	Per cent	Number	Per cent	Number	Per cent	Number	Per cent

D. Cities 25,000 to 50,000	185	150	81	6,423,093	5,254,065			
E. Cities 10,000 to 25,000	608	396	65	9,007,300	6,085,630			

The above table does not include 596 cities of a population less than 10,000 aggregating a total of 3,317,137 from which returns were received for 1931.

1,180 Cities Contributed Returns for June.

For the month of June returns were received from police departments in 1,180 cities throughout the country. In the table which follows are shown the number of returns by States received and published currently during 1931.

Average Daily Offenses.

The daily average of the number of offenses known of the designated classes, as reflected in the following table, are based upon the figures submitted by 1,125 cities which contributed both in May and June. Due allowance was made for the variance in the number of days in each of the foregoing months.

Daily average, 1,125 miscellaneous cities

Percentage Table of Part I Offenses.

The per cent of each offense class to the whole for 1931 is shown by months in the following table. These figures, however, are not intended to indicate crime trends for the particular period but merely reflect the per cent of each class of the designated crimes to the whole group. The figures are based on the total number of offenses reported by all contributing cities, exclusive of obviously defective and incomplete returns.

Instructions for Preparing Monthly Returns.

It is again desired to emphasize the fact that the figures in the monthly returns are based on the number of offenses known as distinguished from the number of arrests made. For example, if a police department receives complaints to the effect that five dwellings have been burglarized, then five offenses of burglary—breaking or entering—should be recorded in the monthly return, irrespective of the fact that an arrest might or might not have been made in any one of the five cases. Figures furnished the Bureau of Investigation, based on the number of arrests made, can not be published in the monthly bulletin. It is also suggested that police officials refer to the instructions appearing on the reverse side of the form from which it will be noted that in column 2 of the monthly return should be entered the total number of complaints received that crimes of the designated classes have been committed. In column 3 should be entered the number of reports which investigation proves to be unfounded. The number entered in column 3 should be deducted from the number in column 2 and the remainder should be placed in column 4. The total of each of the above columns should be noted in the space provided on the return.
